PROJECTS

Smart Car Parking Management System | MERN Stack (React.js, Node.js, Express.js, MongoDB) | Live Demo | GitHub Repository

- Developed a full-stack, multi-location parking management platform using the MERN stack, with Role-Based Access Control for Admin, Staff, and User roles.
- Implemented real-time parking slot management, enabling live tracking and updates of slot availability across multiple locations.
- Built a vehicle management and booking system that lets users search, reserve, and manage parking slots by location.
- Designed secure REST APIs in Node.js and Express.js with JWT authentication to protect user data and role-specific actions.
- Integrated a revenue tracking module that lets administrators monitor earnings across all parking locations.
- Deployed the application end-to-end on Render as a publicly accessible, live product.
