PROJECTS

Smart Car Parking Management System | *MERN Stack (React.js, Node.js, Express.js, MongoDB)*
Live Demo | GitHub Repository

- Developed a full-stack, multi-location parking management platform with role-based access control for Admin, Staff, and User roles.
- Implemented real-time parking slot management, enabling live tracking and updates of slot availability across multiple locations.
- Built a complete vehicle management and booking system, allowing users to search, reserve, and manage parking slots by location.
- Designed secure REST APIs with JWT-based authentication to protect user data and role-specific actions.
- Integrated a revenue tracking module for administrators to monitor earnings across all parking locations.
- Deployed the application end-to-end, making it publicly accessible as a live, working product.
